Just as there are many species of owls found around the world, there are many varieties of CD owls you can create!

**MATERIALS**
- Multiple colors of construction paper*
- Feathers*  
  * Quantities and colors are dependent upon your creativity.
- CD, be sure it’s blank. If you don’t have a CD anything circular will do.
- Scissors
- Glue (glue stick preferred, quick dry glue is also usable)
- Tape

**MATERIALS FOR THE EYES OPTIONS**
There are many options for what to use for the eyes.
- Googly eyes
- Miscellaneous sized bottle caps
- Paper circles for pupils and irises
- Paper circles with marker irises

Use whatever you have available.
Using the construction paper, you will need to cut out the following:
- 1 triangle for a beak (in yellow)
- 2 feet (in brown)
- 2 wings (in blue)

Gather all your selected and prepared components.

Using the glue stick, attach feathers to one side of the construction paper wings.

Then use glue on the tips of wings and attach to front of CD. Be sure that the silver side (with no printing on it) is used for the front of the owl.

Re-enforce the wings by using tape on the back side of the CD. Attach feet using tape.

On the finished side, adhere your choice of eyes and your beak.

Optional: If you have ribbon or string available, attach it to use as a hanger.
