MAKE YOUR OWN

EASTERN HEMLOCK TREE

Make an Eastern hemlock tree!

Materials

- printer
- card stock
- coloring supplies
- scissors
- glue
- tree template 1
- tree template 2

1

Print two copies of each template. Color one side of each tree if desired. For texture, use a crayon to make a rubbing on tree bark.

2

Cut around the outline of each tree. Be careful to follow the same pattern for each template.

3

Fold each tree in half with the pattern on the inside of the fold.

4

Glue one half of tree 1 to one half of tree 2 so that the limbs align. Repeat for the other two pieces.

5

Align the limbs again and glue the two joined pieces together.

6

To create an Eastern hemlock tree!
