

ANIMAL

SIGNS

Sometimes we don't see an animal, but we see what clues it left behind to show that it was here.

1 Footprints

After it rains, you might see the impression of an animal's foot in the wet soil.

After eating, animals will sometimes leave other evidence that they were in your yard.

Scat 2

3 Empty Seed Shells

Empty seed shells might be left by hungry birds and rodents.

Holes in your yard might mean that skunks are searching for grubs to eat.
