Nocturnal animals are active at night and sleep in the day.

Diurnal animals are active in the day and sleep at night.

Crepuscular animals are active at sunrise and sunset.

FOLLOW THE CLUES TO FIND THESE NOCTURNAL ANIMALS

I hunt at night
I fly silently
I can see in the dark

WHO AM I?

I might eat breakfast before I sleep
I have white stripes on my back
I use my scent to keep you away

WHO AM I?

FOLLOW THE CLUES TO FIND THESE DIURNAL ANIMALS

I scurry around all day
I collect and bury my food
I jump from tree to tree

WHO AM I?

I spend the day calling "jay jay"
I live in the forest and near people
I use my bill to open seeds

WHO AM I?

FOLLOW THE CLUES TO FIND THESE CREPUSCULAR ANIMALS

I am out at dusk and dawn
I use my big ears to hear
I have a white spot at the end of my tail

WHO AM I?

I browse for food in the early morning
I am shy and don't want to be seen
I flash my tail when there is danger

WHO AM I?
